

M & MH RANGE
Rough Terrain forklifts

Handling your world

Founded over 60 years ago by the Braud family, Manitou Group now operates worldwide. A world-leader in all-terrain material handling, the Group designs, produces, distributes and services equipment intended for construction, agriculture and industries.

The Group's product ranges include: telescopic loaders including rotary and heavyweight all-terrain telescopic forklift-trucks, semi industrial and industrial all-terrain masted forklifts, compact loaders (skid-steers) on wheels or tracks, aerial work-platforms for personnel, truck-mounted forklifts, warehousing equipment and attachments.

Thanks to its high-profile brands, Manitou, Gehl and Mustang, and its network of 1,400 dealers throughout the world, the group provides the best solutions, creating most value for its customers.

With its head office in France, the group had a revenue of €1.332 billion in 2016 in 140 countries and employs 3,700 staff who are resolutely focused on customer satisfaction.

1958

First Manitou forklift truck created based on an idea from Marcel Braud.

1972

Group's global expansion began.

Sales & marketing partnership agreement signed with Toyota for the exclusive distribution of Toyota industrial forklifts in France.

1981

Manitou's first telehandler launched.

1984

The company went public.

1993

First MRT rotating telescopic forklifts were launched.

1995

Aerial workplatforms launched.

1996

Manitou was ISO-9001-certified for the first time.

1998

Marcel Braud appointed Chairman of the Supervisory Board..

2007

Manitou inaugurated a 22,000 m² international logistics center.

3 brands
distributed by
1.500 dealers
in 140 countries

MANITOU | **GEHL** | **MUSTANG**

- 21 subsidiaries
- 11 production facilities
- 3.700 employees worldwide
- 65% of the share capital held by the founding families
- 78% of revenue comes from foreign markets
- Revenue of 1.332 billion euros in 2016

2008

The American Gehl Company was acquired.

2009

Governance changed and the company went back to having a Board of directors.

2010

Gehl and Mustang articulated loaders launched.

2012

Crossover agreement signed with the company Yanmar for the manufacturing and distribution of compact excavators.

2013

Partnership with Yanmar made stronger with Yanmar taking a 6,26%-stake in the Group's capital.

2014

January: Michel Denis appointed as President and CEO.
April: new roadmap hinged in the three divisions, including one for service.

2015

Celebration of the 500,000th machine sold in the world.

2016

Launch of the new MLT range, NewAg.

NEWAG

2017

Inauguration of the new entity Manitou Equipment India, specialised in compact loaders and backhoes.

The Manitou rough-terrain forklift trucks

Renowned by their sturdiness and performance even under extreme conditions, the M and MH forklift trucks go where others do not!

By combining simplicity and productivity, power and maneuverability, these machines allow for effective and safe operation.

VERSATILITY

Machines adapted to your needs

On paved or loose ground, M and MH forklifts are perfect for virtually any surface.

2/4
wheel-drive

Transmission
**Hydrostatic
or
Torque conv.**

Capacities from
2.6 to 7
tonnes

M

MH

* Option that allows the operator to shift from 4 to 2 wheel drive.

SAFETY

Visibility & safety

Clear visibility is essential to ensure operator's safety and a safe work environment. Our machines have been designed with that in mind:

Mast: Optimised hose routing for better vision during load lifting.

Panoramic **rear view mirror** (standard feature for Ms).

Curved **counterweight** for improved rear visibility.

360° panoramic cab.

Shock absorber (for M forklifts only)

The shock absorber technology keeps the load stable, allowing you to effectively tackle nearly any terrain.

Machines easy to use and maintain

The M range are easy to maintain, reducing turnaround times and related costs.

- Simplified design (reduced number of electronic components), resulting in lower maintenance costs.
- Easy access to key components located under the engine hood.
- Waterproof enclosures protect main electronic components from dust
- and humidity.

The electro-hydraulic tilting of MH cabins ensure quick access to mechanical components for easy servicing.

You can tilt the cabin with a single button for effective maintenance.

COMFORT

Access made easier

Across its range of products, Manitou puts strong emphasis on operator's safety and comfort when accessing and exiting the cabin.

Regardless of the driver's body type, the operator can easily access the cabin thanks to the following features:

- a fixed handle on the front left side of the overhead guard;
- non-slipping footboards located on both sides; and
- large open space on the floor.

Operator comfort

Spacious and comfortable, the cabin offers the operator a smooth driving experience, reducing fatigue and increasing productivity.

- **Spacious cabin with panoramic view.**
Full vision cabin with optional automatic doors that can be folded back.
Suspended cabin that reduces ground vibrations.
Efficient heating and ventilation system as standard, air conditioning (optional)
- **Ergonomic levers**
The cabin brings controls within comfortable reach of the operator's finger.
On MHs, the JSM is an optional feature to have all handling functions in the palm of your hand.
- **Functional buttons**

*Joystick Switch and Move

PERFORMANCE

Productivity

Excellent gradeability

Equipped with large diameter front wheels, excellent weight distribution on both axles and central differential locking system, the machines of this range offer high capacities .

M forklifts are available in 2 or 4 wheel drive versions (except for the M70 — 2 wheel drive version only)

MH forklifts are on 4-wheel drive.*

Axles

- **Rear axle** with excellent oscillating angle for M.
- On MH, **steering axle with built-in cylinder** which offers an exceptional turning radius.

Mast lifting height of up to 7m

The forklift width ensures better stability for increased safety when handling long or heavy loads.

15° **mast tilt** for M and 12° for MH.

Excellent ground clearance (43 cm for M and 26 cm for MH)

Turning radius from 3.40 m.

On MH, its turning radius is from 3.27 m . Ideal for storage areas or tight spaces.

** Option available to shift from 4 to 2 wheel drive.*

Thanks to its mechanical linkage, with an engine located at the rear of the machine, the MH is an exceptionally compact machine (less than 2m in height), boosting a capacity (2 to 2.5 tonnes). MHs feature a Kubota engine with 48.6 Kw (Stage 3B) or 36 kW (Stage 3A) power.

The 4 in-wheel motors provide for perfect traction on sloping or uneven ground.

MH forklifts feature hydrostatic transmission only.

Engine and transmission

M forklifts feature a next-generation Stage 3B engine with diesel particulate filter.

These engines help reduce fuel consumption **up to 13%**.

2 transmission options available:

Torque converter

Torque converter allows the operator to choose between drive speed on stable ground or engine torque for traction on irregular ground (4-speed gearbox).

Hydrostatic*

(on M, only in 2-wheel drive trucks)

Recommended for applications requiring:

- high permanent power output;
- permanent speed control;
- high precision for accurate operation and handling;
- Repetitive braking: The automatic braking function when releasing the accelerator pedal offers smooth driving for the operator.

For all your applications !

M and MH forklifts are perfectly adapted to rough terrain applications. The tyres, engine power and robustness of the machine are designed for intensive duties.

Versatile machines

With a wide array of available options and attachments that you can adapt to handle any application, Manitou rough terrain forklifts can perfectly meet your specific needs.

M

Sawmills, vehicle recycling,
Building material dealers,
Industrial construction,
Mines, Container ships...
Even on uneven terrain

MH

Sawmills,
Market gardening, plantations,
Construction,
Different industries...
Even on uneven terrain

Tyres

M and MH forklifts feature two type of tyres:

- All terrain: ideal to travel over sloping or uneven terrain.
- Mixed : perfectly adapted to shift from road to off road conditions (and the other way round).

2-wheel drive forklifts come standard with mixed tyres, while 4-wheel drive versions include tyres with appropriate sizes for all terrain conditions.

Our large choice of options provide a solution that addresses compactness and driveability to handle any application.

MH forklifts use tyres between 1450 mm to 1650 mm in diameter. This reduces the risk of punctures and improves stability. In contrast, a standard size helps maintain machine compactness.

Make sure to choose the right tyre. Tyres are a major component in the total cost of ownership (TCO) of the machine. Choosing the tyres that best suit your application will reduce the frequency of tyre changes, and, therefore, the TCO.

Attachments

A range of attachments are available to suit specific applications

Note

These attachments will require 3 or 4 hydraulic services. Therefore, you need to include levers and distributors mounted up to the carriage when placing your order.

Side-shift carriage

Fork positioner

Bucket (for MHs only)

Tilt carriage

Masts options

To meet your specific needs concerning mast heights, MI forklifts include several options:

Duplex (DVT)

Two stage mast with low free lift. The operator can use the hydraulic lever to easily control the mast.

Free Lift Duplex (DLL) - Upon request

Thanks to its central cylinder, the operator has a significant full free lift capacity without raising the mast.

Free Lift Triplex (TLL)

Thanks to its central cylinder, the operator has a significant full free lift capacity without raising the mast. This mast consists of three sections that allow for a significant lift height while condensing down into minimal overall height.

Triplex w/o Free Lift (TSLL)

Three stage mast with low free lift. The operator can use the hydraulic lever to easily control the mast.

We can also respond to your specific needs. Contact your nearest dealer for further information.

Manitou is here to help !

So that you can benefit from an operational forklift all year long, Manitou offers a wide range of products and services that are suited to all your needs.
Contact your dealer!

Expertise and service on a daily basis

Your Manitou dealer can guarantee a complete range of services at all stages of your machine's life and is there to provide support and meet your needs, always looking to provide you with the best solution.

1 400 dealers at your service

The Manitou network is present in more than 120 countries, with over 2,000 expert technicians, specially trained in Manitou technology, who are at your service to assist with everything from purchasing to after-sales.

■ **Dealer network**

A network of experts at your service, whatever your activity (agriculture, construction, industry).

■ **Maintenance contracts**

3 levels of contracts which are tailored to your specific needs: Initial, Advanced, and Excellence. Leave maintenance to your Manitou dealer.

■ **Financing**

Buy or rent? Whatever your business, simplify your investment with financing or leasing solutions using Manitou Finance.

■ **Warranty extension**

With Maniplus, you can extend coverage on your Manitou for up to 5 years. Use your machine with full peace of mind.

■ **The connected solution**

Easy Manager is a simple and flexible tool for managing, optimizing and securing the operational monitoring of your machines.

■ **Used**

In the market for second-hand equipment? The Manitou network can help you. Visit your dealer or used.manitou.com, our dedicated reference site for second-hand machines.

■ **Genuine spare parts**

With more than 70,000 parts available, your Manitou dealer never fails to give you expertise and service you need!

REDUCE

The Manitou group's vision

The REDUCE approach aims to improve the work conditions for machine operators in keeping with better productivity and environmental protection. This means transparency regarding fuel consumption data, reducing emissions, raising awareness of total cost of ownership (TCO), and putting a greater emphasis on the health and safety of operators.

Do you know the real
cost of ownership
of your equipment?

Calculate your TCO on
tco.manitou.com

What does TCO stand for?

The TCO is the total cost of ownership of an asset, more commonly known as the user cost. This indicator takes into consideration fixed costs (such as acquisition, interest, rent and residual value) and also variable costs linked to the use of your machine (such as maintenance and operator training).

Unlike the automobile sector, the handling machine sector does not yet have a standard rating system. We have therefore created a clear internal protocol enabling us to compare our machines' fuel consumption measurements. In order to provide you with clear, reliable and transparent information, this data has been verified by a recognised organisation.

We indicate the fuel consumption of our machines for the two principal activities for which the machine was designed, as well as the associated CO₂ emissions.

Our recommendations for use will guide you in reducing your fuel consumption and your carbon footprint.

We train our network and the operators of our equipment to reduce their fuel consumption with an eco-driving module.

Discover our online calculator, which enables you to personalise your cycle and estimate your consumption, CO₂ emissions and savings.

To raise awareness of fuel costs and CO₂ emissions, Manitou Group has created an eco-driving simulator.

REDUCE Fuel Eco-Program responsibly informs you on the fuel consumption and CO₂ emissions of our MLT and MT machines, as well as our platforms.

Calculate your
fuel consumption on
reduce.manitou.com
